# HOLY CRAP. HOW MUCH?

Don't worry, we don't love math either. So we've done it for you. Please note that these 6-month budgets are on the lower middle side, but not the "eat local food or cup-of-soup at every meal and cut corners everywhere" budgets. They also don't account for eating out every night in Bali or getting massages daily. You know, if that's something you plan on doing.
